ABSTRACT. *Understand and teach the concept of civic education with reference to the three space of time (past, present, and future). Citizens will learn better by seeing what had happened before to provide universal understanding in the future. Learning about the past, present and future needs of teachers and lecturers are able to examine it carefully to see the essence and dynamics, as well as the objectivity to be given to students and students to produce citizens who are always ready under any circumstances. Assessment, implementation, and absolute curriculum is very well prepared for the demands of international life has been a part of life pupil / student in particular to work hard to realize what the demands of the 21st century Planting moral values and ethics should be maintained so as to realize the human resources that have attitude toward good democratic life.*

ABSTRACT. *Indonesia still placed as a corrupt country. Therefore, the prosecution of corruption needs to be ongoing. During this portion is emphasized on the eradication of corruption enforcement efforts for corruption, while prevention and education have not got a balanced portion. It thus coupled has been no empirical data regarding the most dominant factors as the cause of corruption, although there have been theories or opinions of the experts who explain the factors causing corruption. This article questioned (1) How to harmonize between the causes of corruption by eradicating corruption? And (2) How is the development model of the reconstruction efforts to combat corruption effectively? The findings and discussion shows 1) we need to harmonize the internal and external factors cause a person guilty of corruption by prevention, enforcement and education. 2) There are two models of the development of the reconstruction efforts to combat corruption, namely a). Model expanding work program to eradicate corruption by way of using the powers that be to take advantage of opportunities they have. b) The model Consolidation among institutions fighting corruption.*

ABSTRACT. *National integration and social harmony adult back warmly discussed and questioned by many. It is as if sued the significance of a difference with the group destroying another group with no apparent reason and tend not to be accounted for. Anthropologically, it is suspected that one of the main causes of social conflict in society is a matter of cultural diversity. Therefore, the greater the cultural differences with one another predicted the potential for conflict will be greater, especially in a heterogeneous society.*

ABSTRACT. *The objective of research was to find out (1) how the creativity of Pancasila and Civic Education Teacher is in utilizing an informatics technology and communication-based learning media; (2) what the constraints are; and (3) what the effects of ITC-based learning media are on teachers and students. The result of research showed that: (1) the creativity of Pancasila and Civic Education Teachers in SMK N 1 Banyudono in utilizing an informatics technology and communication-based learning media, in making preparation, the teacher saw the condition of media to be used first and prepared material and video consistent with RPP (Learning Implementation Plan), in modifying the material by adding pTIKure and video originating from internet in order to be more attractive, while in the term of evaluation, the teachers adjusted the material with the media used. (2) The constraint the teachers of SMK N 1 Banyudono faced in utilizing an informatics technology and communication-based learning media was inadequate infrastructure in learning media. (3) The effect of informatics technology and communication-based learning media use in Pancasila and Civic Education subject on students was that it made the students interested in and understanding the material taught. The effect on the teacher was that civic knowledge and ITC facilitated them to search for information related to the material taught, related to civic skill, that can develop its creativity by downloading pTIKures and video relevant to the material taught from the internet and then developing them into an interesting material to be taught to the students.*
